<b>Target version:</b>		<b>Affected version:</b>	2.4.1
<b>Resolution:</b>			
<b>Description</b>			
Fix typo			

#### History

##### #1 - 2013-12-10 12:11 - Toshi MARUYAMA

- Status changed from New to Closed

It's not typo.

"ext" means "extension" which is "png", "jpeg", etc.

##### #2 - 2013-12-10 12:18 - Ilya S

why parse extension if its not using?

##### #3 - 2013-12-10 13:10 - Toshi MARUYAMA

See regexp.

```
ext <- $2 <- (bmp|gif|jpg|jpeg|png)
```

##### #4 - 2013-12-10 13:13 - Ilya S

I mean ext variable assign, but not using anywhere

##### #5 - 2013-12-10 13:31 - Toshi MARUYAMA

```
["test.txt", "test.png"].each do |s|
  s.gsub(/([^\"]+)\.(bmp|gif|jpg|jpeg|png)/) do |m|
    filename, ext = $1, $2
    puts $2
  end
end
```

```
$ ruby a.rb
png
```

##### #6 - 2013-12-10 14:16 - Ilya S

why do you instantiate ext object if you don't use it at all?
