

Redmine - Feature #15701

Add project identifier substitution option to the URL-pattern property of link format custom fields

2013-12-15 01:28 - Mischa The Evil

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Jean-Philippe Lang	% Done:	0%
Category:	Custom fields	Estimated time:	0.00 hour
Target version:	2.5.0		
Resolution:	Fixed		
Description			
<p>Following r12353¹, I think it could be very useful to also provide a project <i>identifier</i> substitution option for the link format URL pattern property.</p> <p>While I was adding this new substitution I found some typos in the test methods names, which I fixed first.</p> <p>I extracted two patches against source:/trunk@12406. The feature patch includes a simple test similar to the ones already provided for the other substitution options.</p> <p>¹ Jean-Philippe: you've done a great job on its branch; lots of backend improvements, six useful new features and a bugfix (#13385). Thanks and :thumbsup:!</p>
