

Redmine - Defect #16095

Viewing issue: role permissions should hide start date, due date, time and % done and any related history

2014-02-14 03:27 - Richard Gunn

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Issues permissions	Estimated time:	0.00 hour
Target version:		Affected version:	2.4.2
Resolution:	Invalid		
Description I have created a customer specific role & user and edited their permissions (role and workflow) to hide time related fields. The correct behaviour is exhibited for this user under this role creating/updating issues - no time related fields are shown. However when viewing the issue as this user the start date, due date, % done and estimated time is visible, as is the history related to this. Please refer to the attached screen shot. Environment: Redmine version 2.4.2.stable Ruby version 1.9.3-p484 (2013-11-22) [x86_64-linux] Rails version 3.2.16 Environment production Database adapter Mysql2 SCM: Subversion 1.8.4 Git 1.8.3 Filesystem Redmine plugins: redmine_mylyn_connector 2.8.2.stable			

History

#1 - 2014-02-14 20:42 - Richard Gunn

- File issues.png added
- File role.png added

Additionally, the role constraints do not flow through under issues -> options -> columns list: the due date, estimated time and % done are visible, can be selected & added as columns onto the issue list although the user's role disables all time tracking

screenshots: issues.png, role.png

#2 - 2014-02-22 12:40 - Jean-Philippe Lang

- Status changed from New to Closed
- Resolene set to Invalid

Disabling time tracking permissions for a role does not prevent this role from viewing start/due dates and estimates.
For now, there's no way to hide these standard fields to certain roles.
