Description
I have a project which name consist in 2 characters. I want to identify it with 2 characters too but Redmine fails creating it complaining about the identifier being too short (which is specified in the form). I can't understand why a project identifier can't be 2 (or even 1!) character long.
It's possible to change that validation?
Thanks!

- File redmine.identifier.patch added

I've attached a trivial patch against 0.7 svn branch that do the trick.

Ups! Broken patch attached, here is the correct one...

#3 - 2008-08-21 09:21 - Thomas Lecavelier

you should introduce a test case about that patch.

I'm sorry, I'm not a RoRer nor a Rubyier, I managed to make the patch because it was trivial, but I have no idea of how to make a testecase for redmine.

I'll appreciate instructions or that somebody else do it.

Thank you

- Status changed from New to Closed

- Target version set to 0.8.1

- Resolution set to Fixed

r2221 lowers this limit to 2.

#6 - 2009-01-03 16:34 - Leandro Lucarella

Thanks!

May I ask why not to have a limit of 1?

#7 - 2009-03-29 04:31 - Leandro Lucarella

- Status changed from Closed to Reopened

I'm reopening the bug because I don't see any reason to set the limit to 2 instead of 1 (i.e. non-empty).

Please don't re-open bugs of a closed milestone. What you've done is mark the 0.8.1 milestone as 'open' again when it was closed again. I'd suggest opening a new ticket and reference this one from the new one.

#9 - 2009-03-30 14:55 - Leandro Lucarella

Ok, I'm sorry, I just opened a new bug report ([#3073](#)). Unfortunately I can't re-close this one myself.
