Redmine - Defect #16395

Subproject filter is not saved in query if "For all project" is checked

2014-03-20 06:02 - Ofer Nave

Status:	New		**Start date:**	
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	Issues		**Estimated time:**	0.00 hour
Target version:				
Resolution:			**Affected version:**	2.5.0

Description

When looking at the list of issues in a project that contains sub-projects, I can add a filter for "Subproject" with the value "none" which filters out all the sub-project issues, leaving just the issues that are directly in the parent project. This is very useful.

However, when I click "Save" and give it a name and then save it, the Subproject filter gets dropped.

```
Environment:
Redmine version            2.5.0.stable.12980
Ruby version               1.9.3-p484 (2013-11-22) [x86_64-linux]
Rails version              3.2.17
Environment                production
Database adapter           Mysql2
Redmine plugins:
redmine_dmsf               1.4.8 devel
redmine_time_tracker       0.4
```

History

#1 - 2014-03-21 01:26 - Ofer Nave

- Status changed from New to Resolved

Seems to be working now, though I'm not sure how -- I didn't change anything. In fact, I had deleted it, then it showed up again today, this time working correctly.

If I learn more, I'll reopen/update this.

#2 - 2014-03-21 01:37 - Jean-Philippe Lang

- Status changed from Resolved to Needs feedback

I guess you're checking "For all project" when saving your query? The subproject filter is not available for cross-project queries, that's why the filter is dropped.

#3 - 2014-03-21 01:43 - Ofer Nave

Yes, I did. I found it very useful, and so wanted to share. :)

Good to know why it didn't work, thanks.

Too bad. This was wery usefull functionality for me...
for example i have this project structure:
Company1
-- Project1
--- Subproject1
--- Subproject2
-- Project2
Company2
-- Project1
--- Subproject1
-- Project2
Company3
-- Project1
--- Subproject1
--- Subproject2
-- Project2

and there are about 50+ companies wich must use similar querries to use.
Now I must make 150+ similar querries instead 3.

#8 - 2016-07-11 06:23 - Chi Song Tao

I want to add a custom query for every project to list issues with subprojects'. How can I edit the query?
