Redmine - Defect #1640

Custom boolean field ignoring default value setting

2008-07-14 18:04 - Guy Kaiser

Status:	Closed		**Start date:**	2008-07-14
Priority:	Normal		**Due date:**

Category:	Custom fields		**Estimated time:**	0.00 hour
Target version:				
Resolution:	Fixed		**Affected version:**	

Description

A custom field of type 'boolean' is displayed as checked/true in the "New Issue" page even though it's default is false/unchecked in the field's properties page. If I look at the custom_fields table in MySQL I can see that the default_value field for the property is 0, so it appears to be saved correctly there.

This is a custom field that was added in the "Custom fields" page, it did not come over from a migration of any sort.

Redmine is running with via a mongrel cluster setup through Apache2.

Software information:

- db version: mysqld Ver 5.0.51a-3ubuntu5.1 for debian-linux-gnu on i486 ((Ubuntu))
- ruby version: ruby 1.8.6 (2007-09-24 patchlevel 111) [i486-linux]
- rails version: Rails 2.1.0
- redmine version: Redmine 0.7.devel.1645 (MySQL)

I would be more than happy to provide any more information that I can about this issue.

Associated revisions

Revision 1668 - 2008-07-14 19:29 - Jean-Philippe Lang

Fixes boolean custom fields tags (broken by r1592) (#1640).

History

#1 - 2008-07-14 19:28 - Jean-Philippe Lang

- Status changed from New to Resolved

- Resolution set to Fixed

This should be fixed in [r1668](#).
Can you confirm ?

After updating to [r1669](#) I can confirm that this is working correctly and is resolved.

Thank you for the prompt response, and I apologize for not attempting to update to a newer revision before filing this issue. :)

#3 - 2008-07-14 20:39 - Jean-Philippe Lang

- Status changed from Resolved to Closed

You don't have to apologize, it wasn't fixed before you reported this problem :-)
Thanks for the feedback.
