

Redmine - Defect #16568

Referencing commits to issues across all projects

2014-04-08 16:04 - Pavel Potcheptsov

Status:	Needs feedback	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	SCM	Estimated time:	0.00 hour
Target version:		Affected version:	2.4.0
Resolution:			

Description

I have situation when referencing works in one case and doesn't work in other.

Settings:

☒ Subversion

☐ Darcs

☐ Mercurial

☐ Cvs

☐ Bazaar

☒ Git

☐ Filesystem

✓ svn

✓ git

1.8.8

1.7.1

You can configure your SCM commands in config/configuration.yml. Please restart the application after editing it.

Fetch commits automatically

Enable WS for repository management

Maximum number of revisions displayed on file log

100

Referencing and fixing issues in commit messages

Referencing keywords

refs,references,issueID

Multiple values allowed (comma separated).

Allow issues of all the other projects to be referenced and fixed

Enable time logging

Activity for logged time

Default

Tracker	Fixing keywords	Applied status	% Done	
<div>all</div>	<div>fixes,closes</div>	<div>Fixed</div>	<div>100 %</div>	<div></div>
	Multiple values allowed (comma separated).			<div></div>

It works when referencing issue is in parent project for repository's project:

https://redmine.mysite.ru/projects/parent/revisions/53

	Name	Size	Revision	Age
53	refs #14511		53	1 minute

Latest revisions

#	Date	Author	
53	2014-04-08 15:14	Pavel Potcheptsov	refs #14511, - one, - two.
52	2014-04-04 15:17	Pavel Potcheptsov	refs #14511. Third line has been added to readme.
51	2014-04-04 14:34	Pavel Potcheptsov	refs #14511

- **% Done** changed from 10 to 20

It doesn't work when referencing issue isn't in parent project for repository's project:

	Name	Size	Revision	Age	Author
<input type="checkbox"/>	branches		89	about 2 hours	
<input type="checkbox"/>	trunk		81	6 days	

Latest revisions

#		Date	Author	
89		2014-04-08 13:35		refs 14672 fixing of lost connection problem after sleeping of iPhone.
88		2014-04-07 16:46		refs #13716. - Afterheater block is invisible now when it is not installed. - Afterheater block is grayed now when it is disabled.

Feature #13716

Update Log time Watch Copy Delete

- Description updated ([diff](#))

I execute this manually after commit:

```
# cd /var/www/rm2.4.0/ && ruby ./script/rails runner "Repository.fetch_changesets" -e production
```

Environment:

Redmine version 2.4.0.stable.12309
Ruby version 1.9.3-p327 (2012-11-10) [i686-linux]
Rails version 3.2.15
Environment production
Database adapter Mysql2

SCM:

Subversion 1.8.8
Git 1.7.1
Filesystem

Redmine plugins:

multi_time_tracker 0.1.1
projects_table 0.0.4
redmine_better_gantt_chart 0.9.0
redmine_drafts 0.2.0
redmine_equipment_status_viewer 1.0.1
redmine_fields_permissions 1.0.0
redmine_hide_estimated_hours 1.0.5
redmine_lightbox 0.0.1
redmine_monitoring_controlling 0.1.1
redmine_plugin_views_revisions 0.0.1
redmine_timesheet_plugin 0.7.0
redmine_xls_export 0.2.1.t4

History

#1 - 2014-05-07 05:47 - Toshi MARUYAMA

- Status changed from New to Needs feedback

It seems user does not have "View changesets" permission.

#2 - 2014-05-14 13:06 - Pavel Potcheptsov

- File `rm_refer6.png` added

Hello, I believe all our users have this permission:

Repository

☐ Manage repository

☒ Commit access

☒ Browse repository

☐ Manage related issues

☒ View changesets

Work:

```
project(repository) --> sub-project(issue)

project(issue) --> sub-project(repository)
```

Doesn't work:

```
project(repository)
project(issue)

project(repository)
project --> sub-project(issue)

project(issue)
project --> sub-project(repository)

project
|-----> sub-project1(repository)
|-----> sub-project2(issue)

and a lot of variants here..
```

#3 - 2014-05-14 13:23 - Toshi MARUYAMA

I think some of your plugins cause problem in following lines.

- [source:tags/2.5.1/app/controllers/issues_controller.rb#L115](#)
- [source:tags/2.5.1/app/models/changeset.rb#L50](#)

#4 - 2014-05-14 15:54 - Pavel Potcheptsov

I think some of your plugins cause problem in following lines.

What should I search in source code of my plugins?
How to locate which one cause this problem?

I've found that [xls_export_plugin](#) has relation with issue_controller starting from line 76.
