

Redmine - Defect #16743

Project list lists all projects, even if user is not added to them

2014-04-23 17:03 - Peter L.

Status:	Closed	Start date:	
Priority:	High	Due date:	
Assignee:		% Done:	0%
Category:	Accounts / authentication	Estimated time:	0.00 hour
Target version:		Affected version:	2.5.1
Resolution:	Invalid		
Description			
I added a new user group called "external employees" and just created a user for it.			
When I log in, i can already see all projects - even when I have not added the external user to any project. This seems like a security problem to me?			

History

#1 - 2014-04-23 17:04 - Peter L.

I meant that i created the group without ANY rights!

#2 - 2014-04-24 11:24 - Rafal Lisowski

You sure the projects are not public?
I use version 2.5.1 and project list works as expected.

- Status changed from New to Resolved

Damn, thanks! Was set to public...

But could you maybe tell me, to hide the roadmap?
I just want a user, which can add tickets and see/change/delete only his own tickets? And not see the roadmap versions?
I'm somehow too dumb or its not possible?

Thanks!

#4 - 2014-04-24 12:31 - Rafal Lisowski

That plugin may be helpfull for you https://github.com/efigence/redmine_project_form_extended

Damn, thanks! Was set to public...

I think it's not possible right now see <http://www.redmine.org/projects/redmine/wiki/RedmineProjectSettings#Core-modules>
There is "Manage version" permission for role (Administartino -> Roles and permissions -> some role) so you can disable adding new versions for role.

But could you maybe tell me, to hide the roadmap?
I just want a user, which can add tickets and see/change/delete only his own tickets? And not see the roadmap versions?

#5 - 2014-04-24 12:44 - Peter L.

Hmm ok..

Thanks for your answers!
