Redmine - Defect #1681

NoMethodError in WikiController#index

2008-07-24 15:10 - A. Ni.

Status:	Closed		**Start date:**	2008-07-24
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	Database		**Estimated time:**	0.00 hour
Target version:				
Resolution:	Invalid		**Affected version:**	

Description

Called the only wikipage (startpage called "wanganui") and got this with #r1694:

```
undefined method `protected?' for #<WikiPage:0xb6e9d7b4>

RAILS_ROOT: /home/arnen/Documents/privat/RoR/redmine-r1694

Has duplicate Redmine - Defect #4206: Repeatedly running of db_migrate fails ...		**Closed**	**2009-11-12**

History

#1 - 2008-07-24 15:17 - Thomas Lecavelier

that's smell that you forgot to run

```
rake db:migrate
```

on your database...

#2 - 2008-07-24 15:48 - A. Ni.

OK, updated the databases (had to use this fix though), but the error remains. Though the message is shorter:

```

#3 - 2008-07-24 17:06 - Jean-Philippe Lang

Did you restart the app ?

#4 - 2008-07-24 19:40 - A. Ni.

Yes, I did restart the app. Also, I installed another webserver (lighttpd) via

```
ruby script/server -e production -d lighttpd
```

and tried to use the app with that. No change, still the error. It's a little bit odd because the wiki thing worked fine in v0.7.3 (rubygems 2.0.1) and before upgrading the database (comment #1) and before upgrading rubygems to 2.1.

#5 - 2008-07-26 10:58 - Jean-Philippe Lang

Please run the following and report the result:

```
$ ruby script/console production
Loading production environment (Rails 2.1.0)
>> WikiPage.column_names
=> ["id", "wiki_id", "title", "created_on", "protected"]
```

#6 - 2008-07-28 09:38 - A. Ni.

It looks like the column protected is missing:

```
ruby script/console production
Loading production environment (Rails 2.1.0)
```

```
>> WikiPage.column_names
=> ["id", "wiki_id", "title", "created_on"]
>> quit
```

#7 - 2008-08-25 13:58 - Jean-Philippe Lang

- Status changed from New to Closed

- Affected version (unused) deleted (devel)

- Resolution set to Invalid

Database was not migrated. Please run the migration script on the appropriate environment, just like it's mentioned here: [RedmineUpgrade](#).
Eg.

```
rake db:migrate RAILS_ENV="production"
```

#8 - 2008-11-17 06:58 - Tyler Z

- Status changed from Closed to Reopened

I have had this happen twice now to applications of mine, where "rake db:migrate RAILS_ENV="production" does not do as expected.

Running console I get the following output:

Loading production environment (Rails 2.1.2)

        WikiPage.column_names

=> ["id", "wiki_id", "title", "created_on", "parent_id"]

However, this is after running the migrate command as mentioned at the top and with the file "093_add_wiki_pages_protected.rb" in the "db/migrate/" path.

I manually added it last time, but why is it not migrating properly?

#9 - 2008-11-17 07:12 - Tyler Z

However, if I copy 093_add_wiki_pages_protected.rb to 102_add_my_wiki_pages_protected.rb changing the class to AddMyWikiPagesProtected, it works.

It did not work if I simply copied the file and assigned it a new filename, but it did work once I changed the filename and the class name as shown, not sure if the filename required the change because I did it first.

#10 - 2008-11-17 17:12 - Jean-Philippe Lang

Is there (or have you ever put) an other file in db/migrate that starts with 093_ ?

#11 - 2008-11-18 10:20 - Tyler Z

There is not currently, this is a fresh checkout (not an update) of the svn latest, however, I am using a database that I may have previously had my own 093_, when I manually added "parent_id" for wikis to 0.73 version. Is there something stored in the database that associates with the file?

#12 - 2008-11-18 18:08 - Jean-Philippe Lang

- Status changed from Reopened to Closed

> Is there something stored in the database that associates with the file?

Yes, in this table: schema_migrations (see http://api.rubyonrails.org/classes/ActiveRecord/Migration.html).
Redmine migration 93 was not executed because of yours.

#13 - 2009-01-26 20:31 - Randy Black

- File Picture_7.png added

- Status changed from Closed to Reopened

I have the same issue going on.

I have tried:

```
rake db:migrate db/migrate/093_add_wiki_pages_protected.rb RAILS_ENV="production"
```

and still get

```
Loading production environment (Rails 2.1.2)
>> WikiPage.column_names
=> ["id", "wiki_id", "title", "created_on"]
>>
```

which results in the following when I go to the wiki tab

```
Processing WikiController#index (for 216.9.187.117 at 2009-01-26 12:32:47) [GET]

```

This is the error on the web

```
! Picture 7.png !
```

This is a pretty basic installation...

#14 - 2009-01-26 23:42 - Randy Black

Could never get it to migrate successful, so in mysql I did:

```
 ALTER TABLE wiki_pages ADD protected VARCHAR(60);
```

#15 - 2009-01-27 16:47 - Randy Black

I had other issues with the index and date sorting as well.

```
It gave me NoMethodError (undefined method `parent_id' for #<WikiPage:0x7f22fe6d1348>):
```

so I

```
 ALTER TABLE wiki_pages ADD parent_id VARCHAR(60);
```

I'm using bluehost and redmine v 0.8.0 , I'm not sure why the dbmigrate is not working.

#16 - 2009-01-27 18:45 - Jean-Philippe Lang

So, I ask the question again:
Is there (or have you ever put) an other file in db/migrate that starts with 093_ or 095_ ?

#17 - 2009-10-09 04:32 - Yann Autissier

Hello,

I had the same problem when upgrading from v0.7.3 version to 0.8.4.

After successfully running the database migration process with :

```
rake db:migrate RAILS_ENV="production"
```

I got the following error in log/production.log when I tried to call the wiki :

```
NoMethodError (undefined method `protected?' for #<WikiPage:0x7f55c38a7080>):
```

The last migration script in v0.7.3 folder is :

```
$ ls db/migrate/093*
093_add_sessions.rb
```

Issuing the following mysql command, and restarting the app solved this issue :

```
mysql> ALTER TABLE wiki_pages ADD protected VARCHAR(60);
```

Thank you for your support,
Yann

#18 - 2009-12-26 13:16 - Jean-Philippe Lang

- Category set to Database

#19 - 2013-02-06 11:05 - Daniel Felix

- Status changed from Reopened to Closed

I can't confirm this in the latest releases.

Regarding the old release, this seems to be closeable.
Please reopen if this issue still hits you.
