History

#1 - 2008-07-28 16:22 - Carl Nygard

There is a project called [codestriker](#) that provides these capabilities. It is a separate system, but it integrates with most SCM systems. I've used it and it's pretty decent.

Perhaps you can integrate something already written instead of re-inventing the wheel.

#2 - 2008-07-28 19:31 - Daniel Netzer

Yes, something like "codestriker-functionality" to comment "source" would be cool. I'd like to see this for patches as well as for normal commits/revisions as described in #1339
