Description

Hi,

Please help me about email notification. My `_issue.html.erb` content is the following:

```
<li> <b> <%=l(:field_description)%> </b>: <%=h issue.description >
<li> <b> <%=l(:field_status)%> </b>: <%=h issue.status ></li>
<li> <b> <%=l(:field_start_date)%> </b>: <%=h issue.start_date ></li>
<li> <b> <%=l(:field_priority)%> </b>: <%=h issue.priority ></li>
issue.custom_field_values.each do |c| >
<li> <b> <%=h c.custom_field.name > </b>: <%=h show_value(c) ></li>
end %>
```

How can I add only concrete custom fields into the email notification? Now I get notification with every custom field, but I would like to control based on the custom field ID. So if one of the ID is 22, how should look the code?

Thanks
