Target version:				
Resolution:	Duplicate		**Affected version:**	2.5.1

Description

If I try to add a required custom field which is defined as multi-valued list to a spent time report I get an "Redmine 500 error": Internal error.

I've already tried to mark the field as non-required, but without any effect on the error.

In the production.log I found the following additional messages regarding this error:

```
Started GET "/redmine/projects/project/time_entries/report?utf8=%E2%9C%93&f%5B%5D=spent_on&op%5Bsp
ent_on%5D=*&f%5B%5D=&columns=month&criteria%5B%5D=cf_7" for 127.0.0.1 at 2014-06-04 14:39:32 +0200

History

#1 - 2014-06-04 15:15 - Daniel Wagner

Seems that the (generated?) SQL has an unneeded ", AS " in its SELECT clause.

#2 - 2014-06-11 14:09 - Daniel Wagner

I was able to reproduce the issue on a fresh installation of Bitnami Redmine 2.5.1-1.

If I change the custom field so that multiple values aren't allow, I can't reproduce the error any more.
