Add will be usefull too:

1. [#12706](#)
2. [#9432](#)

#2 - 2014-06-09 20:13 - Dev Full stack

For example I want to add private notes only for customer, and only for co-workers, and only for administrators, and only for managers. 4 types/levels/visibility of privates notes.

duplicate of [#1193](#) ?

No!

[#1193](#) and this issue [#17132](#) are different.

In [#1193](#) note(**all**) private per role.

In this issues note(**every**) may private per different roles(customer, co-worker, manager, both manager+co-worker, etc.). See the screen private.

Understand the difference?

I didn't find this in features or in plugins.
Please see mockup http://www.redmine.org/attachments/download/11750/private_notes_for_roles_.png of it.

Summary(key features)

1. set visibility of note for any role/roles(multiple too)
2. the ability to set the visibility of the creation
3. the ability to set the visibility, **when you edit the note.**

#9 - 2015-11-17 04:09 - Rauzan Fikri

Hi Alex,

Do you have solved the problem ? i have same problem in my redmine.

#10 - 2021-06-11 09:57 - Go MAEDA

- Has duplicate Feature #12613: Make private comments flag configurable by role added

#11 - 2022-03-18 17:05 - iry ce

Would be nice to see this implemented. At the moment, only administrators are able to see other's private notes.

#12 - 2022-03-18 17:11 - Brian Dunigan

I would also like to request this to be fixed. When you go into Roles and configure them you can see there is a check box to allow viewing of private messages. Things is, it doesn't actually work. In order for a user to see private messages on a ticket they have to set as an Administrator of the Redmine site. This should go with out saying, that's not Ideal. Can this please be looked into? Thank you
