Description

As of Redmine 2.5.1 the group options appear to be limited to:

- My custom queries
- Custom queries

with the layout on screen something like this:

My custom queries

* Query 1

* Query 2

* Query 3

* Query 4

Custom queries

* Query 1

* Query 2

* ...

I believe that a layout similar to this would be useful to organize the queries:

My custom queries

Query Group 1

* Query 1

* Query 2

* ...

Query Group 2

* Query 3

* Query 4

Custom queries

* Query 1

* Query 2

* ...

The query groups could be collapsible to keep from taking up too much screen space.
