

Redmine - Defect #17213

A redmine user can raise/create a tracker even though he/she is not a member of project

2014-06-18 07:37 - Lajish Lakshmanan

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Projects	Estimated time:	0.00 hour
Target version:		Affected version:	2.5.1
Resolution:	Duplicate		
Description			
<p>Currently in my organisation, we are handling too many projects through redmine. In testing team different members works in different projects. Hence testing team member from other projects can create issue in project in which they are not members.</p> <p>If we made project not public then others not able to view issues of other project. But generally members of other projects should be able to view issues and respective comments but shouldn't able to edit any changes into it.</p> <p>Can we have a corresponding facility in each project's setting where non members can edit issue, comments, wiki, add document etc....</p>

You can configure the permissions a Non-Member has in Administration/Roles and Permissions. This will be applied to all projects.

It seems your current problem is that you have a "Testing Team" group. You assign this group a certain role to all projects. You don't want all members of that group to have permissions to all projects.

If that is the case, one solution would be create testing groups for each project. "Testing Team Proj A", "Testing Team Proj B", etc.

Can we have a corresponding facility in each project's setting where non members can edit issue, comments, wiki, add document etc....

Are you asking for a per-project Non-Member permissions?

If so I think this would align with **Feature #850: Per-project role permissions**

I would also consider this as a duplicate of your previous request: [#16661](#).
