Description

I tried upgrade my redmine server from 1.3.1 to 2.5.1, but it failed
I dump the data from my redmine 1.3.1 server, and then insert the data to my redmine 2.5.1 server
I use apache to run redmine 2.5.1, it can be accessed, but cannot login, the error message is like below
Completed 500 Internal Server Error in 23.2ms
NoMethodError (undefined method `must_change_passwd?' for #<User:0x2545d524>):
 app/models/user.rb:291:in `must_change_password?'
 app/controllers/application_controller.rb:91:in `start_user_session'
 app/controllers/application_controller.rb:168:in `logged_user='
 app/controllers/account_controller.rb:253:in `successful_authentication'
 app/controllers/account_controller.rb:200:in `password_authentication'
 app/controllers/account_controller.rb:186:in `authenticate_user'
 app/controllers/account_controller.rb:40:in `login'
before I insert the data, I have migrated the db

I want to know whether redmine 1.3.1 can be upgraded to 2.5.1?

History

#1 - 2014-07-04 12:42 - Toshi MARUYAMA

- Status changed from New to Closed
- Resolution set to Invalid

You need to run "rake db:migrate".
