

Redmine - Defect #17579

Edit Watchers List Loses Checked Watchers When Performing Multiple Searches

2014-07-29 14:44 - Brandon Liles

Status: Closed	Start date:
Priority: Normal	Due date:
Assignee:	% Done: 0%
Category: Issues	Estimated time: 0.00 hour
Target version:	Affected version: 2.4.2
Resolution: Duplicate	
Description	
<p>When editing the watchers list on an issue, if you search for a user, click their name but do not click "Add", and then perform a new search, the clicked contact is lost.</p> <p>It would be more intuitive if checked watchers were not lost by doing a new search. The search could filter the user list client-side instead of requiring server round trips, and this would prevent the clicked contacts from being lost.</p>

+1 in 2.6.0

I think it would be good if either the system "remembers" previously checked options or the system adds or removes watchers in "real-time" as the user is clicking.

#4 - 2016-11-11 14:53 - Luka Lüdicke

I tested the patch from #17071#note-1 (which is two years old) and it fixes the issue. When will it be applied?

btw: that is a good example where the select2 widget could provide a elegant solution <https://select2.github.io/examples.html#multiple>

- Status changed from New to Closed

- Resolution set to Duplicate

I've added some proposals to fix this behaviour in #28771.

I'm closing this ticket as duplicate of #17071.
