- Status changed from New to Resolved
- Resolution set to Fixed

I enabled the Gravatar user icons, but I'm unsure if that'll use significant bandwidth.
I'll leave the ticket open for JPL to close and potentially revert the change, if Gravatars eat up the bandwidth.

Images are served by www.gravatar.com, so there shouldn't be a noticeable raise in bandwidth usage of redmine.org server.

Hi, I'm worry about the gravatar tracks movement on internet.
I think the user need a button (default off) for permission to take the hash from email.
