Ability to render multiple partials with view hook (#17763).

#### History

##### #1 - 2014-09-12 07:21 - Jean-Baptiste Barth

Isn't it easier to add a "parent" partial that groups the other ones you'd want to render ? Maybe you can explain why this is needed.

Plus we need to have some tests if we ever want to merge this in.

##### #2 - 2014-09-12 07:37 - Ilya S

It's easier, in case of multiple partials within one plugin, but if you have multiple plugins using the same hook - it's a problem.

##### #3 - 2014-10-13 08:45 - Ilya S

any thoughts?

##### #4 - 2014-10-13 20:25 - Jean-Philippe Lang

This patch assumes that we're rendering partials which is just one of the many #render options. I'd like something that does not depend on that.

##### #5 - 2014-10-13 21:04 - Jean-Philippe Lang

- File *multiple\_render.patch* added

Here is another option, feedback is welcome. Basically, the syntax would be:

```
render_on :some_hook, :partial => "show_more_data"
render_on :some_hook, {:partial => "show_more_data"}, {:partial => "show_even_more_data"}
render_on :some_hook, {:partial => "show_more_data"}, {:inline => "<%= show_even_more_data %>"}
```

##### #6 - 2014-10-18 10:10 - Jean-Philippe Lang

- Tracker changed from Patch to Feature
- Subject changed from ability to render multiple partials with view hook to Ability to render multiple partials with view hook
- Category changed from Core Plugins to Plugin API
- Assignee set to Jean-Philippe Lang
- Target version set to 3.0.0
- Resolution set to Fixed

Feature added in [r13449](#).

##### #7 - 2014-10-24 20:50 - Jean-Philippe Lang

- Status changed from New to Closed
