Target version:	2.6.0			

Description

To improve user account security, we believe it is a good practice to expire all other active user sessions (on other computers or browsers) once a user changes their password.

Please find attached a patch that implements this feature against current trunk; tests included.

Good practice I think. Same as [#17717](#), I'd like to have some guidance about how we deal with that kind of patch. I didn't test this one but I'll review it and test it when I know what to do.

#2 - 2014-09-13 11:55 - Jean-Philippe Lang

We can commit this patch now, but I'd like to change the new column to passwd_changed_on instead of password_changed_at.

#3 - 2014-09-13 22:24 - Etienne Massip

- Project changed from 2 to Redmine

- Category set to Security

- Target version set to 2.6.0

#4 - 2014-09-16 23:39 - Jean-Baptiste Barth

- Status changed from Needs feedback to Closed

Added in [r13412](#) with the column name requested by Jean-Philippe, and a minor typo fixed in the test. Thanks!
