

Redmine - Defect #17887

NoMethodError (undefined method `downcase' for nil:NilClass):

2014-09-16 14:10 - Tristan S.

Status:	Needs feedback	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	SCM	Estimated time:	0.00 hour
Target version:		Affected version:	2.5.2
Resolution:	No feedback		
Description			
<p>When I follow the instructions at http://www.redmine.org/projects/redmine/wiki/HowTo_keep_in_sync_your_git_repository_for_redmine and point the repository to the just mirrored git repo, I get a Redmine 500 error, with the following in the production log:</p> <pre>NoMethodError (undefined method `downcase' for nil:NilClass): app/models/changeset.rb:100:in `scan_for_issues' app/models/repository/git.rb:218:in `save_revision' app/models/repository/git.rb:207:in `block (2 levels) in save_revisions' app/models/repository/git.rb:204:in `block in save_revisions' app/models/repository/git.rb:203:in `each' app/models/repository/git.rb:203:in `save_revisions' app/models/repository/git.rb:153:in `fetch_changesets' app/controllers/repositories_controller.rb:114:in `show'</pre>			

History

#1 - 2014-09-16 14:11 - Tristan S.

Environment:

Redmine version 2.5.1.stable.13174
Ruby version 2.0.0-p481 (2014-05-08) [x86_64-linux]
Rails version 3.2.18
Environment production
Database adapter Mysql2

SCM:

Subversion 1.8.8
Git 1.9.1

#2 - 2014-09-16 14:45 - Toshi MARUYAMA

- Category changed from Importers to SCM

#3 - 2014-09-16 15:02 - Toshi MARUYAMA

- Status changed from New to Needs feedback

Log says Setting.commit_ref_keywords is nil.

source:tags/2.5.2/app/models/changeset.rb#L118

It seems your Redmine installation is broken.

#4 - 2014-09-16 15:39 - Tristan S.

It's a fresh install... Just updated (via "svn update") to 2.5.2.stable.13410 and still the same problem. How is my installation broken?

#5 - 2014-09-25 12:16 - Masato NODA

I guess that settings table has NULL value when name = 'commit_ref_keywords' or your config/setting.yml is broken. Because, if settings table doesn't have row when name = 'commit_ref_keywords', Setting.commit_ref_keywords returns value of commit_ref_keywords.default in config/setting.yml

#6 - 2014-11-17 03:13 - Terry Hwang

Hello Masato NODA and Tristan,

I have same problem in one of two redmine systems only when I connected HTTPS subversion.

The db table had a value "refs,references,IssueID" for name "commit_ref_keywords".

working system's environment:

Environment:

Redmine version 2.5.1.stable
Ruby version 1.9.3-p231 (2012-05-25) [i386-mingw32]
Rails version 3.2.17
Environment production
Database adapter Mysql2

SCM:

Subversion 1.8.9
Git 1.9.0
Filesystem

Redmine plugins:

no plugin installed

System not working:

Environment:

Redmine version 2.5.2.stable
Ruby version 2.0.0-p481 (2014-05-08) [i386-mingw32]
Rails version 3.2.19
Environment production
Database adapter Mysql2

SCM:

Subversion 1.8.10
Git 1.9.4
Filesystem

Redmine plugins:

clipboard_image_paste	1.8
issue_id	0.0.1b
redmine_agile	1.3.3
redmine_code_review	0.6.3
redmine_didyoumean	1.2.0
redmine_hudson	2.1.2
redmine_monitoring_controlling	0.1.1
redmine_wiki_lists	0.0.3
sidebar_hide	0.0.7
