Description

I a ticket has subtasks: It would be very helpful if the subtasks are grouped relating to the main task. Even mor better: a small hint in css attribute about subtasks-depth. There is already a css class "child" in general.

+ Main Task <== can be done by css "parent"
--Subtask 1 <== can be done by css "child"
--subtask 2

Now it looks like

--subtask 2
Main Task
+--Subtask 1
