Redmine - Feature #18043

Links to anchors inside the page should be pagename-independent

Description

To have links internal to a document, I have to do something like this:

```
some text, see [[Pagename#Chapter2|Chapter2]] for more information.

[...]

h3. Chapter2
```

It would be great if the link was:

```
[[#Chapter2|Chapter2]]
```

I think we should consider this as related to #10689, for internal links in exported PDF documents.

My environment:

```
Environment:
  Redmine version                2.5.0.stable
  Ruby version                   2.1.3-p242 (2014-09-19) [x86_64-linux-gnu]
  Rails version                  3.2.17
  Environment                    production
  Database adapter               Mysql2
SCM:
  Subversion                     1.8.10
  Mercurial                      3.1
  Cvs                            1.12.13
  Git                            2.1.0
  Filesystem
Redmine plugins:
  no plugin installed
```
