

Redmine - Defect #18110

Extraction of list of available locales is probe to bad gems

2014-10-15 22:25 - Ebrahim Mohammadi

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Jean-Philippe Lang	% Done:	0%
Category:	118n	Estimated time:	0.00 hour
Target version:	2.6.0	Affected version:	
Resolution:	Fixed		
Description			
<p>I added a plugin to my Redmine which indirectly depended on kaminari gem who contains a badly named kaminari.yml locale file: https://github.com/amatsuda/kaminari/tree/master/config/locales. Hence a second "English" named language with a key of kaminari is added to list of Redmine languages.</p>			

Associated revisions

Revision 13450 - 2014-10-18 11:07 - Jean-Philippe Lang

Ignore locales without :general_lang_name key (#18110).

Revision 13462 - 2014-10-20 23:10 - Jean-Philippe Lang

Merged r13450 (#18110).

Which list contains this second "English" language ? Can you provide a screenshot or something and a way to reproduce this problem, thanks.

#2 - 2014-10-16 22:44 - Ebrahim Mohammadi

Dropdown list of Redmine languages is shown in these two locations both of which are affected:

- My Account -> Language
- Administration -> Settings -> Display -> Default language

Non-tested steps to reproduce:

- Add kaminari to Gemfile of Redmine as dependency
- bundle update
- rails server

- See any of two affected lists of Redmine languages

#3 - 2014-10-16 23:32 - Jean-Philippe Lang

- Resolution set to *Cant reproduce*

I tried this already but was not able to reproduce.

#4 - 2014-10-17 09:35 - Ebrahim Mohammadi

I think kaminari has to be loaded in Redmine in order to add its locale path to `::I18n.load_path` which is used in `Redmine::I18n::Backend.available_locales` in `lib/redmine/i18n.rb`.

#5 - 2014-10-18 11:08 - Jean-Philippe Lang

- Status changed from *Needs feedback* to *Closed*
- Assignee set to *Jean-Philippe Lang*
- Target version set to *2.6.0*
- Resolution changed from *Cant reproduce* to *Fixed*

I was able to reproduce and it's fixed in r13450 (make sure to clear your cache).

Locales without the `:general_lang_name` locale are now ignored.
