Description

In Russian words are long.
and very often issues becoming stripped by 255 chars.

i believe, #5698 was solution to prevent VERY long subjects.
but hardcoding 255 for whole system seems to me very strange solution.

so, I'm requesting new feature - make subject.strip configurable!

- Status changed from New to Closed

#5698 is for Rails validation.
"string" length depends on Database.
We cannot change mail_handler.rb limits without Issue#subject definition change.

#3 - 2014-11-19 11:39 - Yar n

without what?

#4 - 2014-11-19 12:48 - Toshi MARUYAMA

Issue#subject database field definition change.
