

Redmine - Feature #18257

Allow wiki macros to define the markup used for their documentation

2014-11-01 21:41 - Felix Schäfer

Description

Current plugins delivering additional macros for the wiki syntax often provide their help in textile form, which doesn't render well when markdown is selected as the renderer.

There should be an option for wiki macros to signal what markup their plugin docs use, and render this documentation accordingly.

History

#1 - 2014-11-14 02:53 - Jens Krämer

- File 18257.diff added

Here's a patch adding the possibility to specify macro docs in any number of formattings, keeping textile as the default. Markdown formatted docs for built in macros included.

#2 - 2014-11-14 03:49 - Jens Krämer

- File 18257.diff added

updated patch including test case
