Try clear cache (see [#13520#note-12](#)).

Ruby version 2.1.1-p76 (2014-02-24) [x86_64-darwin13.0]

Try recent Ruby.

Latest ruby version is 2.1.5.

It doesn't help.

Try recent Ruby.

Latest ruby version is 2.1.5.

Thanks! I'll try.

If you don't intend Rails 4 porting of plugins, please try without plugins.

I ported them. The error is raised even in pure redmine installation running locally through

```
rails s
```

#4 - 2014-12-08 13:11 - Denis Savitskiy

Ruby update to 2.1.5 and update with trunk didn't help.

#5 - 2015-01-05 08:26 - Toshi MARUYAMA

- Status changed from New to Needs feedback

- Target version deleted (3.0.0)

I cannot reproduce on trunk [r13839](#).

Well, tested on 2.6.1 stable running in development environment with Webrick, but the error repeated - with default app locale set to Russian, when user logs in with locale set to English, app crashes with:

```

I think, it is not covered in tests. Try: set default language to English, login, change profile language to Russian, shut down the server. Run it again and login. Boom!

I got this issue,

I think it's related to debug mode and some cache files, my redmine is run in debug console via ruby, when I open it in that mode there are labels "pl:translation_is_missing:..." for some plugins links etc. Then when lang is changed to en - there is 500 error in both production and debug clearing cache + restart helps

This is because Redmine extends I18n with its own caching methods.

I found a clue to my error here:
<http://www.redmine.org/issues/12900>

There were language files with wrong name, in my case pl.yml with first line as: "en:"
when I corrected this - no error 500
Hope this will help someone else and maybe there is a way to detect such errors in lang files? It can be in any plugin :(

Yepp, I had the same error in a plugin.
