

Redmine - Defect #19173

Trac Migrate Script with Redmine 3.0

2015-02-24 20:43 - Robert V

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Importers	Estimated time:	0.00 hour
Target version:		Affected version:	3.0.0
Resolution:			

Description

I have a basic Redmine 3.0 installation, using the redmine migrate_from_trac script

```
mysql Ver 15.1 Distrib 5.5.41-MariaDB, for Linux (x86_64) using readline 5.1
ruby 2.0.0p353 (2013-11-22) [x86_64-linux]
Rails 4.2.0
```

CentOS 7 install, using EPEL's ruby version.

```
[root@ticket redmine]# ./bin/about
```

```
sh: svn: command not found
sh: darcs: command not found
sh: hg: command not found
sh: cvs: command not found
sh: bzz: command not found
```

Environment:

```
Redmine version      3.0.0.stable
Ruby version         2.0.0-p353 (2013-11-22) [x86_64-linux]
Rails version        4.2.0
Environment          production
Database adapter     Mysql2
```

SCM:

```
Git                  1.8.3.1
Filesystem
```

Redmine plugins:

```
redmine_agile       1.3.7
```

```
[root@ticket redmine]# rake redmine:migrate_from_trac RAILS_ENV="production"
```

```
rake aborted!
```

```
NoMethodError: undefined method `set_inheritance_column' for TracMigrate::TracAttachment(Table doesn't exist):Class
/usr/local/share/gems/gems/activerecord-4.2.0/lib/active_record/dynamic_matchers.rb:26:in `method_missing'
/var/www/redmine/lib/tasks/migrate_from_trac.rake:121:in `<class:TracAttachment>'
/var/www/redmine/lib/tasks/migrate_from_trac.rake:119:in `<module:TracMigrate>'
/var/www/redmine/lib/tasks/migrate_from_trac.rake:25:in `block (2 levels) in <top (required)>'
```

```
Tasks: TOP => redmine:migrate_from_trac
```

```
(See full trace by running task with --trace)
```

```
[root@ticket redmine]#
```

And again with --trace:

```
[root@ticket redmine]# rake redmine:migrate_from_trac RAILS_ENV="production" --trace
** Invoke redmine:migrate_from_trac (first_time)
** Invoke environment (first_time)
** Execute environment
** Execute redmine:migrate_from_trac
rake aborted!
NoMethodError: undefined method `set_inheritance_column' for TracMigrate::TracAttachment(Table doesn't exist):Class
/usr/local/share/gems/gems/activerecord-4.2.0/lib/active_record/dynamic_matchers.rb:26:in `method_missing'
/var/www/redmine/lib/tasks/migrate_from_trac.rake:121:in `
```

Related to Redmine - Defect # 20943: migrate_from_trac.rake dont work

Resolved

History

#1 - 2015-03-14 12:35 - Senthil Kalimuthu

I'm newbie to ruby..

I had the same issue and able to pass few more errors from here... I'm on Ubuntu 14.04.2 and the ./bin/about is

Environment:

```
Redmine version      3.0.0.stable
Ruby version         1.9.3-p484 (2013-11-22) [x86_64-linux]
Rails version        4.2.0
Environment          production
```

Database adapter PostgreSQL

SCM:

Subversion 1.8.8
Darcs 2.8.4
Mercurial 2.8.2
Cvs 1.12.13
Bazaar 2.7.0
Git 1.9.1

Filesystem

Redmine plugins:

redmine_agile 1.3.8
redmine_checklists 3.0.4

I'm able to pass this error by changing the the "set_inheritance_column :none" to "self.inheritance_column = nil" on line numbers 121 and 166.

I got this clue from [stakeoverflow](#) that set_inheritance_column is deprecated from rails 3.1.

I was able to pass the next error which is again deprecated like set_inheritance_column . Replaced "set_primary_key :name" to "self.primary_key = :name"

The error was NoMethodError: undefined method `set_primary_key' for TracMigrate::TracWikiPage(Table doesn't exist):Class

Now I'm having another error which I dont have a clue..

```
root@orion:/u01/data/www/redmine# rake redmine:migrate_from_trac RAILS_ENV="test" --trace
```

```
** Invoke redmine:migrate_from_trac (first_time)
** Invoke environment (first_time)
** Execute environment
** Execute redmine:migrate_from_trac
```

WARNING: a new project will be added to Redmine during this process.

#3 - 2015-03-25 16:27 - Toshi MARUYAMA

- Category changed from Ruby support to Importers

#4 - 2015-03-25 16:28 - Toshi MARUYAMA

- Related to Defect #19174: db migrate error from old version to 2.6 added

#5 - 2015-03-25 16:30 - Toshi MARUYAMA

- Related to deleted (Defect #19174: db migrate error from old version to 2.6)

#6 - 2015-04-01 10:43 - Mathieu BODIN

I was able to get rid of those errors by updating migrate_from_trac.rake (for the record I'm running rails 4.2.0)

All I had to do was using :

- self.inheritance_column = :none instead of set_inheritance_column :none
- self.primary_key = 'name' instead of #set_primary_key :name

#7 - 2015-11-05 05:32 - Toshi MARUYAMA

- Related to Defect #20943: migrate_from_trac.rake dont work added

#8 - 2016-03-30 12:57 - Michael Pfeiffer

Any solutions for this issue from Senthil?

```
root@orion:/u01/data/www/redmine# rake redmine:migrate_from_trac RAILS_ENV="test" --trace  
** Invoke redmine:migrate_from_trac (first_time)  
** Invoke environment (first_time)  
** Execute environment  
** Execute redmine:migrate_from_trac
```

WARNING: a new project will be added to Redmine during this process.

/usr/local/bin/rake:23:in `load'  
/usr/local/bin/rake:23:in `<main>'  
Tasks: TOP => redmine:migrate_from_trac
```

And I really don't have a clue what's the solution for that :(

Thx

#9 - 2016-07-08 04:31 - J Wong

My workaround for Senthil's issue is to either ignore the text size limit of the custom field, or manually set a constant.

To do this, open the migration script (/path/to/redmine/lib/tasks/migrate_from_trac.rake), search the following:

```
field.name[0, limit_for(IssueCustomField, 'name')]
```

then replace with one of the following:

```
field.name          # Ignore the limit  
field.name[0, 100] # Set a limit
```
