

Redmine - Defect #19193

Custom Field definition inconsistency

2015-02-26 09:19 - Kiran Kumar

Status: New	Start date:
Priority: Normal	Due date:
Assignee:	% Done: 0%
Category: Issues	Estimated time: 0.00 hour
Target version:	Affected version: 2.5.0
Resolution:	
Description	
<p>The custom fields allow us to create a field as 'required' and also allow us to set the visibility per role. But it still mandates the field entry for other users to whom it is not visible.</p> <p>This behavior is inconsistent. Please correct it at the earliest as we need such a customization for our project.</p>

Please correct it at the earliest as we need such a customization for our project.

We strive to fix issues as fast as possible. Redmine is free software and developed as open source. We dedicate our free time to the project, so fixing this may (or may not) need quite a lot of time, depending on the severity of the issue and the ease of creating a solution.

If you really need a fix in a timely manner, it would probably be best you fix the underlying issue and submit a patch.
