Redmine - Feature #19458

Add the ability to expire passwords after a configurable number of days

2015-03-23 19:04 - Holger Just

Target version:	3.1.0		
Resolution:	Fixed		

Description

This patch adds the ability to configure a number of days after which user's passwords should expire. It uses the recently introduced User#passwd_changed_on field. The user-visible end result is the same as if an administrator had manually marked a user with must_changed_passwd.

This patch is against current trunk (r14155) including tests. It was extracted from Planio where we developed this patch for a customer.

This patch might be related to #3155, although this is not directly mentioned there.

- Related to Feature #3155: Password policy and secure logon procedure added

#3 - 2015-03-24 10:01 - Go MAEDA

- File expiration_message_example.png added

The feature sounds good. I have applied the patch and works fine.

It would be great if there is password expiration message like the following example. I am worried that some users will get confused without a message like this.

expiration_message_example.png

#4 - 2015-04-02 09:13 - Go MAEDA

- File 0002-Allow-to-specify-maximum-password-age.patch added

Updated the patch.
Added a error message: "Your password has expired or the administrator requires you to change it."

#5 - 2015-04-06 07:38 - Go MAEDA

- Target version set to Candidate for next major release

#6 - 2015-04-27 07:52 - Go MAEDA

- Target version changed from Candidate for next major release to 3.1.0

Could it be included in next version?
