Thanks for your help.

Have you tried using options in the issue tab? (There you can select which columns to show)

Hi Leonel Lturralde ,

Thanks for your quick answer.

I am trying to export an issue in pdf, not the summary with columns, during the export if I can hide custom fields it will be useful to have not them in the pdf.

Thanks

Ok, I understand now.

The only way to do that without a patch is to set custom fields to be not visible for certains roles.

For example make it not visible for reporters then create a user with reporter role and then export the issue to pdf (custom fields would not be in the pdf).

Ok Leonel, I will certainly do this solution, if you know something about a patch which can help to do this function please let me know.
