<b>Resolution:</b>	
<b>Description</b>	
<p>I need to create a custom field allowing users to specify a <u>set</u> of issue related report numbers and display each of them as link to external system.</p> <p>Now, I can only create a Text field with:</p> <ul style="list-style-type: none"><li>- Regular expression: <code>^\d+([R,S])\d+\$</code></li><li>- Link to URL: <code>external/search?pno=%m1%&amp;t=%m2%no=%m3%</code></li></ul> <p>This works fine but I can only enter <u>single</u> report.</p> <p>I can create a Long text field with:</p> <ul style="list-style-type: none"><li>- Regular expression: <code>^\d+([R,S])\d+(\n)?*\$</code></li></ul> <p>This allows to enter one report per line but Long text has no Link to URL :(</p>

Hello,

Could you solve it?
