<b>Target version:</b>		<b>Affected version:</b>	3.0.1
<b>Resolution:</b>			
<b>Description</b>			
Holà!			
A long time ago, I follow the redmine howto to create a plugin. I have created the <a href="#">*redmine_apijs*</a> plugin for Redmine!			
Today, I have noticed the "check update" button on plugin list. Cooool! But it does not work...			
- my plugin is named: redmine_apijs - my plugin page is named: apijs			
I think this is the problem.			

#### History

**#1 - 2015-04-26 13:40 - Toshi MARUYAMA**

- Category set to Website (redmine.org)

**#2 - 2015-04-26 13:42 - Toshi MARUYAMA**

- Subject changed from Plugin check not working to Plugin check not working if name does not match page

**#3 - 2015-04-26 13:43 - Toshi MARUYAMA**

- Subject changed from Plugin check not working if name does not match page to Plugin check not working if name does not equal page

**#4 - 2015-04-26 22:34 - Tobias Fischer**

You can change the identifier of your plugin page <http://www.redmine.org/plugins/apijs> with the edit button.

Yes, but... a 301 redirect will be added from the old to the new address?
