

Redmine - Defect #19811

Attachment back_url in login

2015-05-11 14:52 - Anton Antilopa

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Attachments	Estimated time:	0.00 hour
Target version:		Affected version:	3.0.2
Resolution:			
Description			
<p>When user needs to be authenticated to download an attachment, he/she logs in as usual, but because the back_url points to a file download instead of a HTML page, the login form stays visible.</p> <p>This is confusing some users. I believe the page should be refreshed automatically to show the welcome#index.</p> <p>Is this fixable? For now I just extended the attachment#show to also work for binary files (show the download link), but it doesn't look very good and it doesn't fix the attachment#download links in back_url, only the attachment#show ones.</p> <p>EnvironmentEnvironment</p> <pre>Redmine version 3.0.2.stable Ruby version 1.9.3-p194 (2012-04-20) [x86_64-linux] Rails version 4.2.1 Environment production Database adapter Mysql2</pre>
