Description
Icons in the Setting Page in the Arabic interface are not aligned correctly they appear behind text. It looks like the it is a .css file issue.

History

It could be fixed if the horizontal position of the background-image is set to 100% instead of 0% in the Arabic version of the application.css file. This would work also for Hebrew.

As demonstrated here:
media="all"
#admin-menu a {
 ~~background-position: **0%** 40%;~~
background-position: **100%** 40%;
background-repeat: no-repeat;
padding-left: 20px;
padding-top: 2px;
padding-bottom: 3px;
}

#2 - 2015-06-21 15:09 - Toshi MARUYAMA

rtl.css should be changed instead of application.css.
