Target version:	
Resolution:	
Description Sorting search filters and search options will help to find quickly what u r looking for. Patching the following method add the requested sort: <ul style="list-style-type: none">• filters_options_for_select• query_available_inline_columns_options• query_selected_inline_columns_options But will be nice if it's in the next release.

- File view-sort-ascending.png added

I'd rather place a small icon view-sort-ascending.png next to the drop-down lists to be able to sort the lists on demand.

layouts/base.html.erb:

```
<script>
$('#query-form, #query_form').find('select').filter('#available_c, #group_by, #query_group_by, #add_filter_select, [id^="query_sort_criteria_attribute_"]').before('<%=
  j link_to_function image_tag('view-sort-ascending.png'), 'sortButtonClicked(this)', class: 'sort-button-link', title: l(:button_sort)
%>')
</script>
```

application.js:

```
function sortButtonClicked(button) {
  const select = $(button).hide().siblings('select').first()
  select.find('option').sort((x, y) => $(x).text().localeCompare($(y).text())).appendTo(select)
  select.children('optgroup').remove()
  select.val('')
}
```

application.css:

```
.sort-button-link {
  padding-left: 4px;
  padding-right: 4px;
  vertical-align: middle;
```

```
}  
  
.sort-button-link img {  
  height: 12px;  
}  
  
.query-columns .sort-button-link {  
  float: right;  
}
```
