Target version:		Affected version:	3.0.3																				
Resolution:	Duplicate																						
Description																							
<p>Hi all,</p> <p>I hope this is a mistake on my side but as far as I understand this might also be a bug in redmine.</p> <p>If I try to post a new issue via the api to https://myredmine/issues.json I would use the following payload according to the documentation (http://www.redmine.org/projects/redmine/wiki/Rest_Issues):</p> <pre>{ "issue": { "subject": "Test subject", "project_id": "myProject", "description": "foobar" }</pre> <p>Redmine now does not create the ticket but responses with a 422 and</p> <pre>{ "errors": ["Project cannot be blank", "Tracker cannot be blank", "Status cannot be blank"] }</pre> <p>After some testing I found a working payload:</p> <pre>{ "issue": { "subject": "Test subject", "description": "foobar" }, "project_id": "myProject" }</pre> <p>My Environment:</p> <p>Environment:</p> <table><tr><td>Redmine version</td><td>3.0.3.stable</td></tr><tr><td>Ruby version</td><td>2.1.2-p95 (2014-05-08) [x86_64-linux]</td></tr><tr><td>Rails version</td><td>4.2.1</td></tr><tr><td>Environment</td><td>production</td></tr><tr><td>Database adapter</td><td>Mysql2</td></tr></table> <p>The issue does not show up on a 2.5.1 installation (both payloads work flawless):</p> <p>Environment:</p> <table><tr><td>Redmine version</td><td>2.5.1.stable</td></tr><tr><td>Ruby version</td><td>1.9.3-p194 (2012-04-20) [i486-linux]</td></tr><tr><td>Rails version</td><td>3.2.6</td></tr><tr><td>Environment</td><td>production</td></tr><tr><td>Database adapter</td><td>Mysql2</td></tr></table>				Redmine version	3.0.3.stable	Ruby version	2.1.2-p95 (2014-05-08) [x86_64-linux]	Rails version	4.2.1	Environment	production	Database adapter	Mysql2	Redmine version	2.5.1.stable	Ruby version	1.9.3-p194 (2012-04-20) [i486-linux]	Rails version	3.2.6	Environment	production	Database adapter	Mysql2
Redmine version	3.0.3.stable																						
Ruby version	2.1.2-p95 (2014-05-08) [x86_64-linux]																						
Rails version	4.2.1																						
Environment	production																						
Database adapter	Mysql2																						
Redmine version	2.5.1.stable																						
Ruby version	1.9.3-p194 (2012-04-20) [i486-linux]																						
Rails version	3.2.6																						
Environment	production																						
Database adapter	Mysql2

History

#1 - 2015-06-17 16:11 - Alexander Muthmann

I found a quick fix for me here:

in issues_controller.rb I reintegrated the method **find_project** and it's call in **before_filter**. This was removed in [r13999](#)
Most likely this is not the preferred way to solve it but this works as a quick fix for me.

#2 - 2015-06-18 07:00 - Mischa The Evil

Please see [#19276](#).

#3 - 2015-06-18 08:39 - Alexander Muthmann

Thank you for this hint. I assume the change will be permanent and the calls to the api have to be changed to the "new" format.

#4 - 2015-06-29 04:05 - Go MAEDA

- Status changed from New to Closed

- Resolution set to Duplicate

According to [#19276-8](#), it is expected behavior.

#5 - 2015-06-29 04:05 - Go MAEDA

- Is duplicate of Defect #19276: Creating new issues with invalid project_id should return 422 instead of 403 error added

#6 - 2016-11-23 10:32 - Go MAEDA

- Related to Defect #23766: API : creating issues with project identifier no longer possible added
