

Redmine - Feature #20310

Ability to switch date format (from relative into absolute) in issue notes titles

2015-07-14 12:26 - Antonio Kless

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Issues	Estimated time:	0.00 hour
Target version:	6.1.0		
Resolution:			
Description On Issue page, if there are some notes, every note has its own title, like "Updated by USERNAME about 1 month ago". If hover "about 1 month ago" with mouse, there is HTML title (hovering tooltip) with absolute date of this note. I ask an option to turn relative-style "about 1 month ago" titles into absolute-style "2015-06-09 16:56" titles by default. So admin (or even user for himself) could switch between this two modes. I'm sorry if there is already such functionality, but I didn't find it.

Almost the same result can be achieved using some custom CSS that would change every individual datetime link to activity pages, so that these lines will be shown (note that I use parentheses to indicate a link), instead of like this:

Updated by (USERNAME) (about 1 month) ago

now like the following:

Updated by (USERNAME) ([2015-06-09 16:56] about 1 month) ago

See the [Task History Updated Dates](#) thread in the forums for the details.

[This code](#)

```
a[href*="activity"][title*=":"]:before {
```

```
content: ' [' attr(title) ' ] ' ;
}
```

used to provide a mostly acceptable workaround, but in Redmine 4.1.1 with jQuery title, hovering the dates has a very bad flickering effect. :(

This may work in application.js:

```
$(document).ready(function() {
  $('a[href*="activity"][title*=":"]').prepend(function() {
    var ret= '['+this.title+' ] ' ;
    this.removeAttribute("title");
    return ret;
  });
});
```

Relative time should only be an option, though.

- File feature-33988-v1.patch added
- File settings.png added
- File relative_time.png added
- File relative_time_with_absolute_time.png added
- File absolute_time.png added

I have written a patch for this feature.
After applying this patch, you will be able to choose your favourite format from three different formats.

settings form:
settings.png

relative_time(default)	relative_time_with_absolute_time	absolute_time
relative_time.png	relative_time_with_absolute_time.png	absolute_time.png

#6 - 2023-08-07 14:14 - Antonio Kless

Thank you [Mizuki ISHIKAWA](#)!

There is a little issue: space between the "days" word and the open bracket is missed in relative_time_with_absolute_time format.

#7 - 2023-08-08 02:16 - Mizuki ISHIKAWA

- File relative_time_with_absolute_time_v2.png added
- File feature-33988-v2.patch added

#8 - 2024-02-02 10:20 - Go MAEDA

- Target version set to Candidate for next major release

#9 - 2024-10-23 14:09 - Holger Just

- Has duplicate Feature #14858: Issues "time" ago added

#10 - 2024-12-20 09:22 - Mizuki ISHIKAWA

- File feature-33988-v3.patch added

Attached is a patch that resolves the conflict.

#11 - 2025-02-13 12:26 - Go MAEDA

- Target version changed from Candidate for next major release to 6.1.0

Setting the target version to 6.1.0.

#12 - 2025-05-06 19:09 - Holger Just

- Has duplicate Defect #42636: I need the detail date -time,such as "2025/04-25 23:11",not such as "11 months ago ",how to do like that ? added
