

Redmine - Feature #20391

Add support for data URI in mails received

2015-07-22 16:54 - Olivier Houdas

Description			
We received mails to our Redmine site starting like that:			
<pre>MIME-Version: 1.0 Content-Type: multipart/alternative; boundary="====_Part_32501_27957161.1437559390340" X-Priority: 3 Importance: Medium X-Mailer: Open-Xchange Mailer v6.18.0-Rev7 X-Originating-IP: 192.168.0.47 -----=_Part_32501_27957161.1437559390340 MIME-Version: 1.0 Content-Type: text/plain; charset=UTF-8 Content-Transfer-Encoding: quoted-printable Bonjour, je voulais savoir s'il fallait installer le client oracle, param=C3=A9trer = le tnsname et une connexion odbc pour pouvoir connecter une base oracle... *[data:image/png;base64,* iVBORw0KGgoAAAANSUgAAAScAAADtCAIAAABYPCRwAAAgAE1E= QVR4nOy9d3QTZ/7vP/x377n3nPs9e3c3wSTBJMG5W1hC2JhASEIC2KRQ7ZBNNgFnC7/v7ia73mU= (...)] The embedded image was not retrieved for this mail. I assume the data:image URI (see Wikipedia) is indeed not supported in Redmine's mail handler. It would be interesting to have it added (here, the mail client used is Open-Xchange, from www.open-xchange.com)</pre>
