Description

Using a table instead of an unorderd list to show numbers of issues in "Issue tracking" box brings the following advantages.

- neatly organized information is easier to unerstand.
- we can directly move to specific information (open features, closed bugs, ...) by clicking numbers.

If you're going to implement this consider adding a small visualization. E.g. a colored bar in another column for each row. Or something like that. It would be nice to get a fast overview.

- Status changed from Closed to Reopened

Thank you for merging the patch!

> Committed in [r14640](#) with link on tracker name removed (same as open count link).

I think that link on tracker names is required for consistency with [issues summary](#) . And sometimes open count link is a little bit hard to click when the number is small (for example: 1, 2, ... 9).

#7 - 2015-10-05 06:03 - Go MAEDA

- File remove-label_x_open_issues_abbr_on_total.diff added

"label_x_open_issues_abbr_on_total" is no longer used since [r14640](#). Please apply [remove-label_x_open_issues_abbr_on_total.diff](#) to remove it from config/locales/*.yml.

#8 - 2015-10-24 12:24 - Jean-Philippe Lang

- Status changed from Reopened to Closed

Done.
