Target version:			
Resolution:			
Description			
<p>Hi, I'm developing a follow feature for a customer and i realize that is not possible to fetch activities from many authors.</p> <p>So i sugest this change:</p> <pre>@scope.each do event_type constantized_providers(event_type).each do provider e += provider.find_events(event_type, @user, from, to, @options) end end</pre> <p>to</p> <pre>if @options[:author].is_a? Array @options[:author].each do a @scope.each do event_type constantized_providers(event_type).each do provider e += provider.find_events(event_type, @user, from, to, @options.merge(author: a)) end end end end</pre> <p>Sry for don't submit a patch, I'm not on my pc now and I don't have svn instaled.</p>			

History

- File *fetch_many_authors.patch* added

Hi,
Here the patch, i think nothing that work before was broken and add new possibilities.

#2 - 2015-08-03 03:38 - Victor Campos

- File *fetch_many_authors.patch* added

fixing patch

#3 - 2015-08-31 02:09 - Toshi MARUYAMA

- Description updated

#4 - 2022-09-15 04:00 - Takenori TAKAKI

- File *20458.patch* added

I made a patch to allow multiple users to be specified on the /activity.
This patch works with the latest Redmine (trunk@21812).
