

Redmine - Patch #20473

Respect the user's timezone when querying issues

2015-08-04 18:52 - Holger Just

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Issues	Estimated time:	0.00 hour
Target version:			
Description <p>When querying issues and using date-based filters like "today" or "3 days ago" or "last month", Redmine uses the current date according to the server's local time as a reference. This might however not be the day in the user's timezone if they use a different one as the server. These queries can then show unexpected issues that do not match the filter according to the user's timezone.</p> <p>Furthermore, even if the date is correct, the exact cut-off time still needs to be done in the user's timezone. Suppose the server is set to GMT and the user has configured Europe/Berlin (GMT+2:00 right now) as their time zone. When querying for all issues updated yesterday, the result should include all issues updated between 2015-08-03 02:00:00 GMT and 2015-08-04 01:59:59 GMT. Right now, it would however only include issues updated between 2015-08-03 00:00:00 GMT and 2015-08-03 23:59:59 GMT.</p> <p>The attached patch against the current trunk fixes both of these issues by applying the following changes to the query model:</p> <ul style="list-style-type: none">• It calculates the cut-of time based on the current user timezone instead of assuming midnight at server-local time• it uses User.current.today instead of Date.today to get the correct reference day in the user's timezone <p>The patch was extracted from Planio.</p>

Could you add tests?
<https://www.google.com/search?q=rails+stub+timezone>

#2 - 2016-02-26 01:16 - Sebastian Paluch

+1

The same issue exists on spent time queries.

#3 - 2016-02-26 04:35 - Toshi MARUYAMA

- Related to Defect #19033: Filters that utilize date/time ignore user's UTC offset added

#4 - 2016-03-26 09:29 - Jens Krämer

In [#22320](#) there's a patch which includes the changes we proposed here, plus some tests and a global replacement of Date.today with User.current.today.

#5 - 2016-03-26 09:48 - Jan from Planio www.plan.io

- Status changed from New to Closed

Closing this in favor of [#22320](#), since the patch proposed there includes this one.

#6 - 2016-03-26 10:29 - Jan from Planio www.plan.io

- Is duplicate of Patch #22320: Respect user's timezone when comparing / parsing Dates added
