

Redmine - Defect #20693

GIT: No files/differences on git merge commit

2015-09-08 11:41 - Anatol Bollinger

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	SCM	Estimated time:	0.00 hour
Target version:		Affected version:	3.0.3
Resolution:			
Description When shown in Redmine Git revisions created by merge commits do not have any files/change entries. Regular commits do have these entries. git diff <commit> on the command line (and in a worktree) shows the changes. Repositories have been created with git clone --mirror .. and are updated by git remote -v update --prune			
Related issues: Has duplicate Redmine - Defect #8741: Git: diff is always empty in merged rev... <div>Closed2011-07-03</div>
