

Redmine - Defect #21222

ActiveRecord::StatementInvalid when trying to update user_setup

2015-11-12 11:53 - Serghei Zagorinyak

Status:	New	Start date:											
Priority:	Normal	Due date:											
Assignee:		% Done:	0%										
Category:	Database	Estimated time:	0.00 hour										
Target version:		Affected version:	2.5.0										
Resolution:													
Description													
<p>From time to time Redmine begins to fail every request with this error:</p> <p>Started GET "/redmine/issues/78317" for 172.23.24.178 at 2015-11-12 13:03:15 +0300</p> <p>Processing by IssuesController#show as HTML</p> <p>Parameters: {"id"=>"38317"}</p> <p>Completed 500 Internal Server Error in 2.0ms</p> <p>ActiveRecord::StatementInvalid (TinyTds::Error: Attempt to initiate a new Adaptive Server operation with results pending: EXEC sp_executesql N'SELECT MAX([settings].[updated_on]) AS max_id FROM [settings]'): </p> <pre>app/models/setting.rb:226:in `check_cache'</pre> <pre>app/controllers/application_controller.rb:97:in `user_setup'</pre>													
<p>So every action that requires update of user_setup failes with this error. This situation is barely reproducible and occurs as often as once in a few months making it absolutely impossible to use Redmine till it is restarted.</p>													
<p>Environment setting are the following:</p> <table><tr><td>Redmine version</td><td>2.5.0.stable</td></tr><tr><td>Ruby version</td><td>2.1.5-p273 (2014-11-13) [x86_64-linux]</td></tr><tr><td>Rails version</td><td>3.2.17</td></tr><tr><td>Environment</td><td>production</td></tr><tr><td>Database adapter</td><td>SQLServer</td></tr></table>				Redmine version	2.5.0.stable	Ruby version	2.1.5-p273 (2014-11-13) [x86_64-linux]	Rails version	3.2.17	Environment	production	Database adapter	SQLServer
Redmine version	2.5.0.stable												
Ruby version	2.1.5-p273 (2014-11-13) [x86_64-linux]												
Rails version	3.2.17												
Environment	production
