

Redmine - Feature #2128

Problems when 'Assigned To' field doesn't match 'Assigned' issue tracker

2008-11-03 23:15 - Mark Thomas

Status:	New	Start date:	2008-11-03
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Issues	Estimated time:	0.00 hour
Target version:			
Resolution:			
Description			
<p>There are problems when the Assigned To field is set, but the issue tracker is not set to <i>assigned</i>. A non-member can set the Assigned-To field even when they don't have permission to make the issue <i>assigned</i>. The issue then shows up in the assignee's "Issues assigned to me" area even when it <i>has not</i> been officially assigned.</p> <p>Note that others struggle with this issue as well. See also #349, #640, and #1919.</p> <p>I can think of a few potential solutions:</p> <ol style="list-style-type: none">1. Hide the Assigned-to field and show it only when the issue is <i>assigned</i>.2. Prevent a New issue from getting an assignment at all.3. Make the availability of the form field depend on user permission for Assignment in the workflow.4. Add new permissions for the Assigned-To field (and perhaps others as mentioned in #1919) so that non-members can be denied the ability to change it.
