

Redmine - Defect #21375

Working external URL prefixes (protocols and 'www' host part) not documented in wiki syntax

2015-11-28 00:38 - Till Riedel

Status: Closed	Start date:
Priority: Normal	Due date:
Assignee: Jean-Philippe Lang	% Done: 0%
Category: Documentation	Estimated time: 0.00 hour
Target version: 3.4.0	Affected version:
Resolution: Fixed	
Description	
As #2953 states <code>/https?:\V.*/</code> and <code>/ftps?:\V.*/</code> links work however documentation on <code>[[RedmineTextFormatting]]</code> mentions only <code>http</code> not <code>https,ftp,ftps</code> . Implementation is inconsistent with documentations if more than only <code>http</code> works, one would expect other URL schemes to work too as mentioned in #2953.

You can update wikis on redmine.org.

This is definition.

source:tags/3.2.0/lib/redmine/wiki_formatting.rb#L113

Implementation is inconsistent with documentations if more than only http works, one would expect other URL schemes to work too as mentioned in #2953.

I think #2953 is not related.

#3 - 2017-03-21 03:19 - Go MAEDA

I have updated `[[RedmineTextFormattingTextile]]` ([diff](#)) and `[[RedmineTextFormattingMarkdown]]` ([diff](#)).

#4 - 2017-03-21 04:26 - Go MAEDA

- File `21375-external-urls-help.diff` added
- Target version set to Candidate for next major release

This patch updates `public/help/*/wiki_syntax_detailed_*.html`.

#5 - 2017-03-23 04:47 - Go MAEDA

- Target version changed from Candidate for next major release to 3.4.0

#6 - 2017-04-03 07:36 - Jean-Philippe Lang

- Subject changed from Working External URLs not documented to Working external URL protocols not documented in wiki syntax
- Status changed from New to Closed
- Assignee set to Jean-Philippe Lang
- Resolution set to Fixed

Committed, thanks.

#7 - 2017-04-16 10:08 - Mischa The Evil

- Status changed from Closed to Reopened

Shouldn't we document the following ones explicitly too?

- www.example.com
- [sftp://sftp.example.com](ftp://sftp.example.com)
- [sftp://sftp.example.com](ftp://sftp.example.com)

#8 - 2017-05-27 12:14 - Jean-Philippe Lang

- Assignee changed from Jean-Philippe Lang to Mischa The Evil

Mischa The Evil wrote:

Shouldn't we document the following ones explicitly too?

Sure, could you prepare a patch for that?

#9 - 2017-06-02 10:30 - Mischa The Evil

Thanks for the feedback. I'll see what I can do (including the wiki page).

#10 - 2017-06-17 13:55 - Marius BALTEANU

- File 21375_more_external_urls.patch added

Because I really want to see the version:3.4.0 released, I took the liberty to create a patch that specify the www, sftp and sftps as URLs. Mischa, the patch matches your expectations? If yes, I'll update the wiki pages, too.

#11 - 2017-06-18 13:23 - Mischa The Evil

- File 0001-Complement-external-URL-documentation-21375.patch added

- Subject changed from Working external URL protocols not documented in wiki syntax to Working external URL prefixes (protocols and 'www' host part) not documented in wiki syntax

- Assignee changed from Mischa The Evil to Jean-Philippe Lang

[...] I took the liberty to create a patch that specify the www, sftp and sftps as URLs. Mischa, the patch matches your expectations? If yes, I'll update the wiki pages, too.

Thanks for chiming in. I've looked at your patch; it seems — with 43 changes — incomplete however¹. It seems to be generated with a (too) basic search-and-replace, using an insufficient search string. As such only changing (a part of the) the textile docs only.

I just completed an other patch which changes all the translations, slightly differently:

hits	old string	new string
54	(http, https, ftp, and ftps)	(starting with: www, http, https,
42	(http, https, ftp and ftps)	ftp, ftps, sftp and sftps)
2	(http, https, ftp, ftps)	

Notes:

- I changed the order in which the link 'types' are mentioned, starting with 'www' as it's probably the most common nowadays (although even that URL-part is being ditched often these days) and it is a hostname identifier instead of a protocol identifier as all the others (informally) are;
- I added starting with: in front of the inline list for better clarity;
- I decided not to add a [serial comma](#) to the inline list, as such adhering to British English spelling instead of American English (it's not required for clarity, there is no clear, official Redmine guideline on what spelling to use and it feels just more natural to me [and probably many other EU-based

users, though I'm biased as my native Dutch language doesn't dictate use of it).

I'll attach the patch implementing this change. This patch, against current source:/trunk@16676, is produced using git format-patch which makes it apply-able using "patch -p1 < 0001-...". It is patch 1/5 of a patch serial of which I'll post patches 2 to 5 in a new issue as they are less related to this initial issue.

I'll also change the wiki pages accordingly when the patch has been committed.

Environment:

Environment:

Redmine version 3.3.3.devel@r16676
Ruby version 2.3.3-p222 (2016-11-21) [x86_64-linux]
Rails version 4.2.8
Environment production
Database adapter Mysql2

SCM:

Subversion 1.8.8
Git 1.9.1

Filesystem

Redmine plugins:

no plugin installed

¹ Redmine currently supports 49 languages, each having two detailed syntax pages (textile and markdown), which makes a required number of changes of 98.

#12 - 2017-06-18 13:53 - Mischa The Evil

- *Blocks Patch #26188: Documentation (detailed syntax help & code) additions/improvements added*

#13 - 2017-06-25 11:01 - Jean-Philippe Lang

- *Status changed from Reopened to Closed*

Committed, thanks.
