

Redmine - Patch #2144

Patch for main-level repository

2008-11-07 12:53 - Andrea Maleci

Status:	Closed	Start date:	2008-11-07
Priority:	Normal	Due date:	2008-11-07
Assignee:	Jean-Philippe Lang	% Done:	100%
Category:	SCM	Estimated time:	2.00 hours
Target version:			
Description			
Here is a patch for High-level repository, ref to Issue #2120 . Here how it works: If a changeset refers to an Issue that has not a linked repository, it looks for an upper lever project, to see if there is a repository. If it has, changeset is linked to that Issue; If a project has no repository linked and is a subproject, it looks for an upper level project. If there is there, it uses that repository so if you click on revision number linked to related Issue, it shows correctly changes made. Hope this helps, Andrea

History

#1 - 2008-11-08 14:38 - Jean-Philippe Lang

- Target version deleted (0.7.3)

Thanks for the patch.
Target removed because already released.

#2 - 2008-12-11 20:55 - Arthaey Angosii

Thanks for writing this patch! It successfully closed a subproject's issue from the commit message.

However, it would be nice if the subproject would also display the "Associated Revisions" section.

#3 - 2013-01-15 22:38 - Jan Niggemann (redmine.org team member)

- Status changed from Resolved to Closed

Closing this, status is resolved since 400 days and more (issue was last updated more than 400 days ago)...
