<b>Resolution:</b>	Fixed		

**Description**

See [RedmineTextFormattingTextile](#), "Links to Repository files".

Add please links to files in another project for both Textile and Markdown. E.g.

```
source:project:repo_identifier|"some file"
```

### History

#### #1 - 2021-02-05 20:43 - Mischa The Evil

- Category changed from Text formatting to Documentation
- Status changed from New to Closed
- Resolution set to Fixed

These links of Redmine links are implemented and documented properly currently. I'll close this issue as such. Please re-open if needed.

Hans Ginzel wrote:

```
[...]  
source:project:repo_identifier|"some file"
```

FWIW: The actual, correct syntax is: `project_identifier:source:repo_identifier|"some file"`.

#### #2 - 2024-03-05 10:50 - VVD VVD

But how to link on root of the repo?

This is doesn't work:

```
source:project:repo_identifier  
source:project:repo_identifier|  
source:project:repo_identifier|. /  
source:project:repo_identifier|./  
source:project:repo_identifier|.. /  
source:project:repo_identifier|../  
source:project:repo_identifier|/ /  
source:project:repo_identifier|./ /  
source:project:repo_identifier|../ /  
source:project:repo_identifier|existing_dir / /  
source:project:repo_identifier|existing_dir / / /
```

Also can't link on a file or dir containing 2 dots in a row:

```
source:project:repo_identifier|file..name
```

Also if a file or dir begins with dot.

Half work:

```
source:project:repo_identifier|/ /
```
