Redmine - Defect #21504

IssuePriority.position_name not recalculated every time it should

2015-12-13 20:52 - Felix Schäfer

Status:	Closed		**Start date:**	
Priority:	Normal		**Due date:**	
Assignee:	Jean-Philippe Lang		**% Done:**	0%
Category:	Administration		**Estimated time:**	0.00 hour
Target version:	3.1.4			
Resolution:	Fixed		**Affected version:**	

Description

The position_name attribute of IssuePriority instances is currently only recalculated when the position of the IssuePriority instance changes source:/tags/3.2.0/app/models/issue_priority.rb#L22

However, the position_name should also be recalculated when the active attribute changes.

I would even argue that that operation is quick enough, and that changes to the IssuePriority list are not frequent and done by administrators, so that the recalculation of the position_name can be done on after_save without filtering.

Patch to follow.

Sure, it's quick enough and this issue would not occur but code that runs when it's actually needed is also a good thing.
Patch committed, thanks.

#3 - 2016-01-09 09:41 - Jean-Philippe Lang
