Description

Hi,

I want to ask you if I can separate users per tracker when an issue is created through IMAP email server. For example if tracker is a bug I just want to accept the user and if the tracker is support I want to create the user.
It would be very helpful if anybody can say me something about that.

Thank You in advance,
Nick

FTR: Separate unknown users per tracker - IMAP email

#3 - 2016-01-04 08:17 - Netko Nesto

Does anybody knows the answer? It would be very helpful.
Thanks.
